

Allgemein

Nachfolgend finden Sie eine nach Quellen sortierte Auflistung der wichtigsten Ereignisse, die der Operations Manager in das Eventlog 'Unicat OM' einträgt.

Übersicht

Category		Event Range	Description
1	Configuration	10000-19999	Problem in system setup or configuration
2	Security	20000-29999	Problem in security configuration, Access rights, System Policys
3	Process	30000-39999	Problem by processing requests, errors in business logic and processes
4	Information	40000-49999	General Information
5	Synchronisation/Discover Process	50000-59999	Information and problems belonging to Sync/Disc

Color	
Red	Indicates an error message
Yellow	Indicates a warning
Green	Indicates an information

OMDispatcher

Event	No.	Category	Description	Action
12001	2001	1	Error querying Registry	Check Registry key Software\UnicatGmbH
32002	2002	3	Dispatcher stopped	
12003	2003	1	Unable to delete c:\temp\lomprocess\insfs	Check for file system rights
12004	2004	1	Critical Error getting Sync-DB	Check Registry key Software\UnicatGmbH\Dispatcher\SyncScope key, Server and database must exist
42005	2005	4	Dispatcher is configured for...	
12006	2006	1	Watching no DB's, please check DBScope in registry	Check SyncScope and DBScope Parameter in Registry Software\UnicatGmbH\Dispatcher

42007	2007	4	Init Service -> License configuration checked:	
42008	2008	4	Init Service -> Waiting for DB Connection...	
12009	2009	1	Init Service -> Unable to connect to database:	Check for databases and SQL-Server connectivity
42010	2010	4	Init Service -> Database list was created,...	
42011	2011	4	Init Service -> CleanUp was done!	
42012	2012	4	Init Service -> checking for interface file...	
42013	2013	4	Init Service -> new interface file required...	
32014	2014	3	Error Copying Modules from Base Server	can not copy if files are locked exclusive, not critical
42015	2015	4	Process started:	
12016	2016	1	Unable to create Interface, check for file:	check rights an ..\Dispatcher\modules
42017	2017	4	Timer elapsed, starting action...	
42018	2018	4	Entering InitService routine...	
42019	2019	4	Process slot free...	
12020	2020	1	Unable to connect to ...	Check database configuration and SQL-server
42021	2021	4	Found id Xin Queue...	
12022	2022	1	OM-Request Xstartet in Process:	Unable to start OMExecute.EXE via WMI, check rights for service account of Dispatcher service
42023	2023	4	OM-Request Xstartet in Process	
32024	2024	3	Skipping, no free Process slot...	check registry configuration for process count
12025	2025	1	Unable to connect to..	Check database configuration and SQL-server
42026	2026	4	New Sync-Thread startet...	
12027	2027	1	SyncProcess failed:	Check DBSync key in registry

42028	2028	4	Process started:	
42029	2029	4	LogReader for ... Querying	
12030	2030	1	Error in Log-Reader Process	Check table tblLogEvent
42031	2031	4	Log reader checked for...	
12032	2032	1	Unable to connect to...	Check database configuration and SQL-server
12033	2033	1	Unable to inqueue Archive request for ...	Check Archive DB and Archive configuration
12034	2034	1	Unable to connect to...	Check database configuration and SQL-server
12035	2035	1	General failure in OMDispatcher:	Check log for corresponding messages
12036	2036	1	Error Initialising oNetUtil !	Check for NetUtil.dll
42037	2037	4	Modules copied from Base Server:	
12038	2038	1	No Connection to Master-Server...	Check database configuration and SQL-server
12039	2039	1	Critical Error getting DB-Object (check registry Settings for DBScope):	Check Registry key Software\UnicatGmbH\Dispatcher\SyncScope key, Server and database must exist
32040	2040	3	Problem fetching Request Id from queue	check inqueue table for corrupt request
42041	2041	4	Entering start state for request...	
32042	2042	3	Reentering init phase for queueu	no action required
12040	2040	1	Error reading queue	check database ntadm2
42042	2042	4	Queue cleanup	
42043	2043	1	FileRequest Inqueue processing fault	check File Request directory for corrupt inqueue files
42044	2044	1	FileRequest Queued processing fault	check File Request directory for corrupt inqueue files
42045	2045	1	FileRequest Archive processing fault	check File Request directory for corrupt inqueue files
42046	2046	4	FileReqeust Thread startet	

42047	2047	1	Unable to start FileRequests Thread	check File Request directory for corrupt inqueue files, check Registry file request settings
12048	2048	1	URI is empty for Mail-requests, please specify URI in Registry!	please specify URI in Registry!
12049	2049	1	Mailrequests: Error getting response from Mailbox	check Registry Mailbox settings
12050	2050	1	Mailrequests: Unable to parse mail	check format of mail request
12051	2051	1	Mailrequests: Wrong Parameters in Mail-body!	check format of mail request
12052	2052	1	Mailrequests: NTADM not connectable	check database connectivity
12053	2053	1	Mailrequests: Mail requestor address unknown!	check for rights of mail requestor
12054	2054	1	Mailrequests: Unable to queue	check format of mail request
12055	2055	1	Mailrequest: Unable to delete mail	check rights of dispatcher account for mailbox
12056	2056	4	MailRequest started	
12057	2057	1	MailRequest Process start failed	check request schema of mail request
12056	2058	4	MailRequest job started	
32059	2059	3	Unable to start request with StartDirect from PreProcess	Check Configuration of Web, Webservice Server, WMI or access rights for executing batches remote
12060	2060	1	Unable to start DLL Updater	Check Configuration of Web, Webservice Server, WMI or access rights for executing batches remote
12061	2061	1	Reduce dispatcher load because of deadlocks	Adjust dispatcher load in registry
12062	2062	1	LDAP Watcher problem stating ldapsearch	control sun one client installation
12063	2063	4	LDAP Watcher started LdapSearch utility	
12064	2064	1	Unable to read registry keys for configuration	control registry access

OMExecute

Event	No.	Category	Description	Action
33001	3001	3	Wrong parameters:	check OMEExecute !/?
33002	3002	3	Error creating classes:	check tblClass and tblAttribute
43003	3003	4	Updating Classes for...	
43004	3004	4	Updating Sync/Disc-Functions for...	
43005	3005	4	Updating Groups and Views for new classes in...	
33006	3006	3	Creating All- and Disabled- Groups failed:	check tblClass and tblAttribute
33007	3007	3	Querying Interface in	
33008	3008	3	Import/Export Rule...	Check for Import/Export Rule
43009	3009	4	Export with rule...	
33010	3010	3	OM-Request Xunable to set process id in DB-Queue:	check database ntadm2
33011	3011	3	Process X succeeded!	
33012	3012	3	Process X failed	Check business logic in Schema
33032	3032	3	Updating groups for interface failed	check database consistency
33033	3033	3	Updating groups for interface	
33034	3034	3	Updating groups for interface failed	check database consistency
33035	3035	3	Updating groups for interface	
13036	3036	1	Unable to set language for OMAAdmin (SQL)	check SQL

OMCore/NTADM

Event	No.	Category	Description	Action
12050	2050	1	Error connecting to database:	Check database configuration
12051	2051	1	License error	Check for required licenses
12060	2060	1	Dispatcher key in NTADM not found !	Check registry
33020	3020	3	Custom Discover Action (RequestSchema: Xremoved from class Y	no action: custom discover request was removed

33021	3021	3	Unable to Inqueue Custom Discover Action	check for custom discover request
33022	3022	3	Custom Synchronisation Action for object X failed	check for custom discover request
33023	3023	3	Custom Synchronisation Action... Removed	no action: custom discover request was removed
33024	3024	3	Unable to Inqueue Custom Sync Action	Check Request Schema
33025	3025	3	Process failed	
12061	2061	1	Error mailing confirmation: ...	Check SMTP configuration in registry
33026	3026	3	Unable to find object ... LogReader Process	check Log Reader configuration
13027	3027	1	LogReader for X,Y failed	Check database configuration
13028	3028	1	Error in NSNTADM.CheckNextLogEvents:	Check database configuration
33029	3029	3	removing crashed request from queue	No Action, clean up
33030	3030	3	Unable to Inqueue Custom Sync Action	check custom sync request
33031	3031	3	SQL-Error in Business Logic Statement	Check Request Schema
22062	2062	2	Access rights for omhome/temp	
22063	2063	2	Unable to read interfaceinfo.dat	Check file system rights
12064	2064	1	EO not found in interface	
12065	2065	1	SQL Server installation version info	
32066	2066	3	Unable to Queue OK/Fail Sub-Request	Check Parameter
32067	2067	3	Error in request.InqueueScript	Check Script in Schema
12068	2068	1	Database Version conflict	Check DB Version, use DBUpdateWizzard
32069	2069	3	Unable to adjust start parameter to requirements	Check type definitions or start parameter
12070	2070	1	Unable to send reject mail	
12071	2071	1	Error creating Archive views	Check database configuration
12072	2072	1	Error adding record to activitalog	Check database configuration

12073	2073	1	Unable to inqueue login request	check tblParameter parameter LogonRequest
12074	2074	1	Unable to set dbo schema for OMAAdmin username	check DB Configuration of login OMAAdmin
32075	2075	3	Unable to copy request to log	check DB, patches

NetUtil

Event	No.	Category	Description	Action
14001	4001	1	Error querying Processes	check for WMI, rights, user
14002	4002	1	Error mailing over...	check SMTP configuration
34003	4003	3	In ClsMapDrive.NetConnectDrive :	check drive configuration in Registry
34004	4004	3	In ClsMapDrive.NetConnectDrive :	check drive configuration in Registry
24005	4005	2	Unable to access folder	check permissions for map folder
34006	4006	3	Script Timeout	Check Script

ClshDB

Event	No.	Category	Description	Action
35001	5001	3	Error in DBUpdateWizzard...	check table tblDBVersion
35002	5002	3	DBUpdateWizzard for database X failed	check table tblDBVersion
35003	5003	3	DBUpdateWizzard for database X failed	check table tblDBVersion
35004	5004	3	Update of Attribute	check Attribute data
35005	5005	3	GetSOACLList:	check HDB
35006	5006	3	GetSOACLList:	check HDB
15007	5007	1	Dispatcher exclusive access	check tblExclusiveAccess
35008	5008	3	View_class has more than 250 attributes	alter class
35009	5009	3	Error in Porperty Script	Check and alter Property Script
35010	5010	5	Error updating linked database	Check linked database
15011	5011	1	Access violation HDBCom	Check user rights
15012	5012	1	Unable to select objects for snychronisation	check sync/discover settings in db

15013	5013	1	Unable to synchronize object in sync-thread	check sync/discover settings in db
15014	5014	1	Unable to apply sync policy	check sync/discover settings in db
15015	5015	1	Unable to apply sync policy	check sync/discover settings in db
35016	5016	3	Error in Update Script for HDB-Attribute	Check Script
15017	5017	1	Unable to connect linked database	Check connection to linked DB
35018	5018	3	Update on parent id is suspect	Check Script
32076	2076	3	Semaphore was overwritten	

Sync/Disc

Event	No.	Category	Description	Action
55001	5001	5	Syncing object	
55002	5002	5	Synchronisation failed	check sync object in foreign system
55003	5003	5	Synchronisation processed	check sync object in foreign system (access rights)
55004	5004	5	Syncing object	
55005	5005	5	Synchronisation failed:	check sync object in foreign system (access rights)
55006	5006	5	Synchronisation failed:	check sync object in foreign system (access rights)
55007	5007	5	Synchronisation failed:	check sync object in foreign system (access rights)
55008	5008	5	Discovering object	
55009	5009	5	Discover failed	check discover object in foreign system (access rights)
55010	5010	5	Database update failed (Last_Sync_Time)	check sync object in foreign system (access rights)
55011	5011	5	Some attributes were not found	check sync attributes in foreign system
55012	5012	5	changed object found in AD	
55013	5013	5	Unable to process part of synchronisation	check sync attributes in foreign system

55014	5014	5	Block-Disc Info	
-------	------	---	-----------------	--

Notes

Event	No.	Category	Description	Action
15018	5018	1	Error getting notes document	check notes configuration (service account, rights)
